

EPSON DESK TOP PRINTERS - PRODUCT AVAILABILITY

All inks for Epson desk top printers are color matched to the original inks, so standard color setting and print profiles can be used. The exception to this is where a 'wide gamut' ink version is offered (shown in red below). These require adjusted color settings or new print profiles. Ink2image offers free ICC color profiles for all 'wide gamut' ink versions. All inks are mixable with the original inks so no printer cleaning or flushing is required before installation.

Printer Model	Recommended Ink Type	Number of Inks	Trio Bulk Ink System	Duo Bulk Ink System	CIS Type Bulk Ink Feed

EPSON PRO WIDE FORMAT PRINTERS - PRODUCT AVAILABILITY

Ink2image offers several ink options for Epson Pro wide format printers. Inks such as Cave Paint Photochrome V2, V3, V4, and Absolute Match are color matched to the original inks, so standard color setting and print profiles can be used. These inks are all freely mixable with the original inks so no printer cleaning or flushing is required before installation. Wide gamut ink versions are also offered (shown in red below) for an increased and brighter color gamut than the original inks. These require adjusted color settings or new print profiles, and Ink2image offers free ICC color profiles for all wide gamut ink versions. When a wider gamut ink is installed on an Epson wide format printer, it is recommended that cleaning cartridges are used first to flush out the printer, primarily to eliminate any color mixing issues. Ink types that require flushing before installation on a given printer model are pre-fixed with ** in the chart below.

Printer Model	Recommended Ink Type	Number of Inks	Compatible 220 ml Cartridges	Bulk Feed Refillable Cartridge Kits
